OBJECTIVE

Results-oriented Analyst leveraging a dual background in Program Evaluation and Business Information Security to support mission-critical decision-making. Proven ability to drive operational intelligence and 23% efficiency gains through data-backed process improvements. seeking to apply expertise in SQL, Python, and compliance governance as a Data & Program Analytics Associate.

SKILLS SUMMARY

Relevant Expertise

- Operational Intelligence & Evaluation: Expert in translating complex datasets into actionable insights, driving impact assessments and program optimization.
- Security-Aware Data Handling: Strong foundation in information security principles, compliance standards, and data governance within regulated environments.
- Data Visualization & Reporting: Proficient in building interactive dashboards (Tableau, Power BI) to communicate trends to leadership and cross-functional stakeholders.

EXPERIENCE

Shift Supervisor (Operational Intelligence Lead) | Starbucks

Oct 2021 - Present

- Operational Intelligence: Analyzed historical sales data to optimize inventory thresholds, reducing order processing time by 50% and minimizing food waste by 10%.
- People Leadership: Supervised cross-functional teams, achieving a 23% improvement in speed of service by optimizing workflows and leveraging technology.
- Compliance and Security: Resolved over 300 technical tickets spanning facility and technology issues to maintain daily operations, demonstrating capability in high-stakes operational environments.
- Performance Measurement: Audited team performance and provided data-backed feedback, resulting in a 10% increase in customer satisfaction scores.

Coding For Data Trainee | Global Tech Academy

Jan 2024 - Apr 2024

- Program Impact Assessment: Collaborated with stakeholders to assess digital strategy effectiveness, providing datadriven evidence that improved user retention by 20%.
- Analytical Rigor: Used Python (Pandas) to merge and aggregate web analytics CSV files into structured datasets to validate new domain architectures.
- Data Visualization: Developed interactive Plotly visualizations to track user engagement, identifying a 42x surge in traffic during peak events.
- Exploratory Analysis: Conducted EDA in Jupyter Notebooks to validate website separation strategies, revealing an 8-point drop in bounce rate.

PROJECTS

Intel Data Analysis for Sustainability

Academic Project

- Data Governance: Engineered SQL queries using Joins, Unions, and CTEs to aggregate and clean data from 2,500+ power plants.
- Impact Assessment: Designed Tableau dashboards to visualize energy trends and identified a 22 million MW surplus.

Strategic Recommendations: Presented evidence to reduce carbon footprints by pinpointing locations with 52% renewable energy generation.

Retail Performance and Demographics Dashboard

- Relational Databases: Designed a MySQL schema to consolidate disparate sales, weather, and demographic datasets for 4 locations.
- Performance Reporting: Developed a Power BI dashboard revealing a 50% decrease in foot traffic during weather events to optimize operational costs.

Academic Project

EDUCATION

Master of Science in Program Evaluation and Data Analytics | Arizona State University**Expected 2027**

Bachelor of Arts in Business Information Security | Arizona State University, W. P. Carey School of Business**Dec 2025**
GPA: 3.69
Relevant Coursework: Cyber Risk Management, Privacy, Ethics and Compliance, Data Wrangling with SQL, Data Analysis with Python, Programming Analytics, Business Database Concepts, Math for Business Analysis

TECHNICAL SKILLS

Languages & Software: SQL, Python (Pandas, NumPy), R Programming, Excel (XLOOKUP, Index/Match), Power BI, Tableau, Plotly.

Core Competencies: Information Security, Program Evaluation, Relational Database Schema Design, Exploratory Data Analysis (EDA), Data Governance.
